AI Insights / Fallback Analysis

Executive summary
LLM unavailable. Showing rule-based fallback summary based on calculated KPIs.

Key insights
- Total value: 176,086.68
- Average value: 510.40
- Rows analyzed: 345
- Total value change vs previous period: 12.80%
- Average value change vs previous period: 4.63%

Risks / anomalies
- LLM insights unavailable.
- The report was generated using deterministic KPI calculations and fallback explanations.

Recommended actions
- Review the KPI Summary and charts manually.
- Validate whether top categories are expected or indicate concentration risk.
- Rerun the report after enabling the LLM layer if qualitative commentary is required.
- Use this fallback report as a reliable numeric baseline.

Questions to ask
- Are the top categories expected for this dataset?
- Are there any missing or invalid values in the source CSV?
- Should the report include deeper data quality diagnostics?
- Should LLM insights be enabled for narrative analysis?
- What explains the change compared with the previous period?

Data Quality Notes

- Rows loaded: 1295
- Estimated usable rows: 1295
- Estimated dropped rows: 0
- Missing date values: 0
- Missing numeric values: 0
- Missing category values: 0
- Invalid date values: 0
- Negative numeric values: 0
